

semi-pro waffle maker

Make perfectly shaped waffles!

To make a good waffle you need to make sure the dough is properly spread on both sides of the waffle maker and this is the reason why we made it possible to reverse our waffle maker.

Pour the dough into the waffle iron, wait for 1 minute, turn it around and that's it! The dough will be properly spread to each corner and on both sides. The homogenized temperature will do the rest for you and ensure you'll get light, golden and thick waffles. The plates and metallic steel removable trays allow an easy cleaning of the machine. The vertical positioning and the retractable handles ensure an easy storage of the device.

True moments of greediness in perspective thanks to the H.Koenig GFX360 waffle maker!
