

Handheld textile cleaner

Give life back to all your textile support

Give life back to all your textile support thanks to the hand cleaner TWT77 by H.Koenig.

Equipped with a 650 W power, the machine allows you to spray water on your supports to clean them, and to vacuum the water immediately. Thanks to its ergonomic handle, you are the one in charge of selecting the flow rate of water ejected. This double function allows you to clean efficiently meshes and fibers of your textiles: mattresses, carpets, sofas etc.

For an optimal cleaning, it is possible to use a soapy product, such as dishwashing liquid or household soap. For resistant stains, you can also apply detergent on the support before use. Dirtiness will not resist you anymore!

Both clean and dirty water tanks are removable, facilitating the filling, emptying, and cleaning. The brush storage unit, the 1.7 m pipe, and electric cables also ensure an ease of use.

Your textile supports will become new again with minimal time and efforts, thanks to the TWT77 by H.Koenig.
